

WHS 014–Plant and equipment

Wallace Concrete Pumping carries out regular inspections and maintenance of all plant and equipment.

Wallace Concrete Pumping ensures plant and equipment is inspected and maintained in accordance with the relevant standard and manufacturer's recommendations.

The inspection and maintenance history of each item is documented.

Certain items of plant and equipment will be 'Item Registered' and or 'Design Registered' by the Regulatory Authority where required by Legislation

Wallace Concrete Pumping ensures control measures are implemented and documented for all plant and equipment, including its operation, deemed as high risk. The effect of all plant and equipment on the workplace is considered and documented in the Safe Work Method Statement

Pre-start checks, schedule of maintenance and fault reports are notified to the Works Supervisor, documented in plant log books and made available to relevant parties on request.

Where plant and equipment is hired, the same requirements as above apply.

A detailed register of all plant and equipment is managed by an Excel Spreadsheet and is located on the Company Server, should further information be required the Administration Director Wallace Concrete Pumping will provide detail from the register.
